EE 102 Week 10, Lecture 1 (Fall 2026)

Date: November 2, 2026

Contents

1 Announcements **2**

2 Goals **2**

3 Review: Output of LTI systems using convolution **2**

4 Review: Breaking down signals **3**

4.1 Periodic signals can be broken down using Fourier series 3

4.2 Aperiodic signals can be broken down using Fourier transforms 3

5 Computing the output of LTI systems **3**

5.1 Output of LTI systems to aperiodic signals in the frequency domain 4

6 Example: First-order decay systems **6**

7 Examples: Filtering **7**

7.1 Filtering an audio mix 7

8 Recommended reading and practice problems **10**
