

EE 102 Week 1, Lecture 1 (Fall 2026)

Date: August 31, 2026

Contents

1	Complex numbers and vectors	2
1.1	Inner products and linear dependence	2
1.2	Inner product via complex numbers.	3
1.3	Real-world significance	5
2	Pre-requisite #3: Circuits	5
3	Introduction to Signals	6
3.1	Continuous-time and discrete-time signals	6
3.2	Sketching signals	6
4	Properties of signals	7
4.1	Scaling	7
4.2	Offset	7
4.3	Linearity of systems	7
4.4	Time invariance of systems	7
4.5	A special signal — the unit step function	8
5	Energy and power of signals	8
